Eco Engineering Expands Business Development Team

New hire brings substantial experience to National Accounts focus and Texas regional initiatives

(February 1, 2017 Cincinnati, Ohio) – Eco Engineering, the largest independent design and build engineering firm in the US energy efficient lighting industry, announced today that it has hired Doug Golden as Director of National Account Sales. Mr. Golden will be based in the Houston market and will join an expanding group of Eco Engineering energy efficient lighting experts in the Texas and Southwest Regional markets.

Mr. Golden brings almost 15 years of energy market experience to the Eco Engineering team. He will assume responsibility for leading the company's efforts for business development to Fortune 1000 organizations and expanding the Lighting as a Service (LaaS) platform.

Prior to joining Eco Engineering, Mr. Golden served as Director of Business Development for Metrus Energy, a market leader in the "Efficiency as a Service" space. For most of the 12 years preceding Metrus, Mr. Golden served as Managing Director and co-founder of NRG Energy's Business Solutions group where he led the development and sale of products and services including large-scale distributed generation (solar and CHP), demand response and energy efficiency to national retailers, restaurant, hospitality and commercial real estate clients. He also served as a Regional Account Director where he directed a group responsible for electricity sales to some of the most recognizable corporate brands and Fortune 500 firms in the U.S. Mr. Golden holds a BS in Economics from Syracuse University.

"Eco Engineering remains committed to helping our customers reduce their energy operating costs while making a positive impact on the environment," said Bill Brunette, Eco Engineering Vice President of Sales & Marketing. "We are excited to have an energy efficiency professional like Doug join our team. His passion, knowledge and experience in our space will provide our customers with superior lighting solutions that maximize energy efficiency, reduce expenses and improve sustainability profiles."

Eco Engineering has been advancing new age energy efficiency concepts in the lighting sector for the past several years. Their services allow Fortune 1000 companies with multiple facilities to achieve both operating expense reductions and sustainability objectives. Mr. Golden will work with Fortune 1000 companies to advance these services and help accelerate the Lighting-as-a-Service concept for energy efficiency in the lighting sector. Additionally, he joins an ever expanding team of energy efficient lighting professionals in the Texas market that includes engineering, operations, installation crews and project development/finance professionals.

Eco Engineering's primary business is providing energy efficient lighting services to both Fortune 1000 firms and large Energy Services Companies (ESCOs). The company has a distinctive profile in that they are an engineering and design firm which comprehensively audits the existing lighting infrastructure of major

facilities to optimize the savings potential from upgraded lighting systems, controls and technologies. Eco Engineering also provides turn-key execution services and performs all project implementation; build out of the new design and EPA compliant disposal services. In addition, the firm helps clients qualify for any federal, state or local utility incentives to reduce project expense and boost return-on-investment.

Eco Engineering completed over 450 large projects in 37 states in 2016 involving office buildings, industrial facilities, schools, hospitals, hotels, retail stores, and distribution centers. The combined impact of these projects for customers was a reduction of 100 million kilowatt hours of electricity per year and more than \$10 million in annual energy savings. The company has been growing rapidly in recent years and expects continued double-digit growth as organizations recognize the importance of sustainability while reducing operating expenses.

About Eco Engineering

For over 20 years, Eco Engineering has helped its customers reduce operating costs through increased energy savings while playing a part in preserving the environment for generations to come. Eco Engineering is a national design build engineering firm who specializes in upgrading large facilities to energy efficient lighting and lighting controls. Eco Engineering has completed thousands of successful projects for customers such as AT&T, Kellogg, Anheuser-Busch, JC Penney, USG Corporation and numerous schools and hospitals.
